

C100 LINE ASSEMBLY INSTRUCTIONS

SNAP ACTION PUSHBUTTON SWITCHES

Component Part Determination

The C100 line of switches is made up of several switch base P/N Series (Chart 1), which are all similar except for circuit configuration. The C100 switchline is available with auxiliary mounting adapters (and associated auxiliary plunger caps) or complete and

ready for mounting as shown on this page. Each switch is supplied complete as shown with all hardware (supplied unassembled).

The completed catalog number is a composite made up of the base switch P/N, suffix number

and suffix letters (when used), which represents one of the components.

To order any P/N identified on this page, select the switch base P/N from Chart 1 and the plunger cap style from Chart 2 as indicated.

Order the complete P/N (including - codes when used). The switch will be supplied from the factory marked with P/N (and - code when used) as ordered.

Switch with Overtravel Adapter - Component Part Determinations

To build any P/N identified on this page, three steps are required:

1. Divide the P/N as shown.
2. Select and order the switch base P/N from Chart 5 and the adapter P/N from Chart 4.
 - a. The switch base P/N must use a #6 plunger cap (see assembly example in Chart 5).

- b. The -code (-DT in the example) usually applies to the switch but may also apply to the adapter.

See Handbook Bulletin #50-32559 for additional details.

When used, dash codes such as -DT (gold plated contacts/terminals) and -HQ (UL Listing), apply to

the switch and must be indicated as part of the base switch P/N. The base switch will be supplied with the base P/N and the "-Code".

See Handbook Bulletin #50-32559 for complete listing of "-Codes".

3. Assembly. Insert the auxiliary plunger into the plunger cap. Insert both parts into the case and screw case on the base switch. Mark the completed switch assembly with the required P/N.

Switch with Overtravel Adapter - Component Part Determinations

To build any P/N identified on these pages, three steps are required:

1. Divide the P/N as shown.
2. Select and order the switch base P/N from Chart 5. Select and order the auxiliary plunger cap from Chart 6 and select and order the adapter P/N from Chart 7.

- a. The switch base P/N must use a #6 plunger cap (see assembly example on Page 6).
- b. The - code, when shown, may apply to the switch base or to the adapter as in cases of engraving or special mounting.

3. Assembly. Insert auxiliary plunger cap into the adapter and screw adapter on the base switch. Mark the completed switch assembly with the required P/N.

Check Handbook Bulletin #50-32559 for complete listing of -codes and applicability.

Chart 8 - Switches supplied with #8 and #9 plunger caps can be used with or without an adapter. When an adapter is required, only Type B (P148 and P148B) adapter can be used.

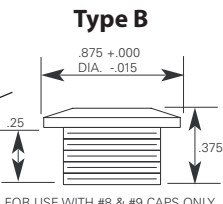

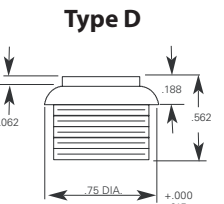

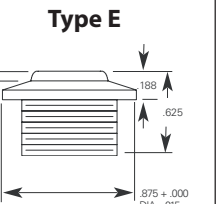

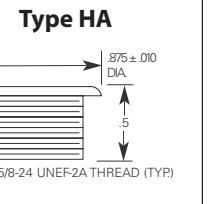

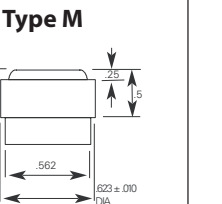

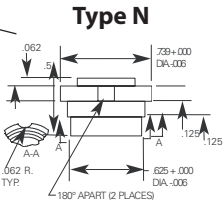

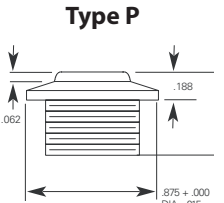

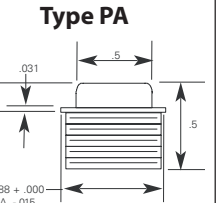

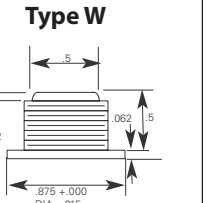

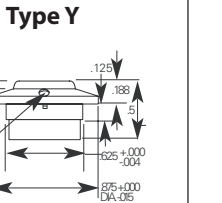

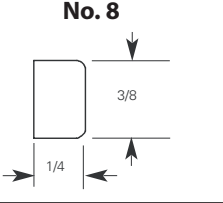

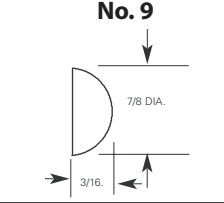

CHART 7									
Standard Adapter Types and Colors

CHART 8	
Switch with #8 or #9 Plunger Cap	
	
Used with Type B Adapter Only	
Auxiliary Plunger Caps are not used with #8 or #9 caps.	
See page 1 for component parts.	

ASSEMBLY INSTRUCTIONS

C100 LINE – SNAP ACTION PUSHBUTTON SWITCHES

Adapter & Switch Assembly

To build switch assemblies with any adapter shown on pages 3, 4 and 5, the base switch must have a #6 plunger cap (any color is acceptable). The combination of adapters and auxiliary plunger caps is designed to use the base switch with the #6 plunger cap. A complete list of base switches with the #6 plunger caps is shown on page 4, Chart 5.

Notes:

1. All mounting and terminal hardware supplied unassembled with each switch and adapter (as required).

5/8 I.D. Lockwasher, Black:	Ref: 16-3209-2
#2 Self Tapping Screw, Clear:	Ref: 11-4090
#2 Self Tapping Screw, Black:	Ref: 11-4090-2
2. Solder Lug Kit P/N:
75-4005 may be used with SPNO, SPNC and Center Terminal Switches.
75-4007 may be used with Two Circuit Switch.
75-4009 may be used with SPDT Switch.
3. For C4100 and C116 (SPDT Circuit).
Supply C200 or C113 Base P/N Switch with Terminal Lug/Jumper Kit #75-4009.
4. Mounting Hardware P/N.

For additional C100 Series Snap-Action Pushbutton Switch information, contact the factory.
